wire preparation of input/output:

2x0.75mm² (H03VVH2-F or H03VV-F)

※Please make sure you connect these correctly otherwise your product will not function correctly and could be damaged.

※Note: Any other requests we can customized.

■Dimming Operation

※Connect the Dali signal line to the Dali bus of the controller (the Dali Master).

After Dali Master scanning and address assignment, the driver can be successfully dimmed.

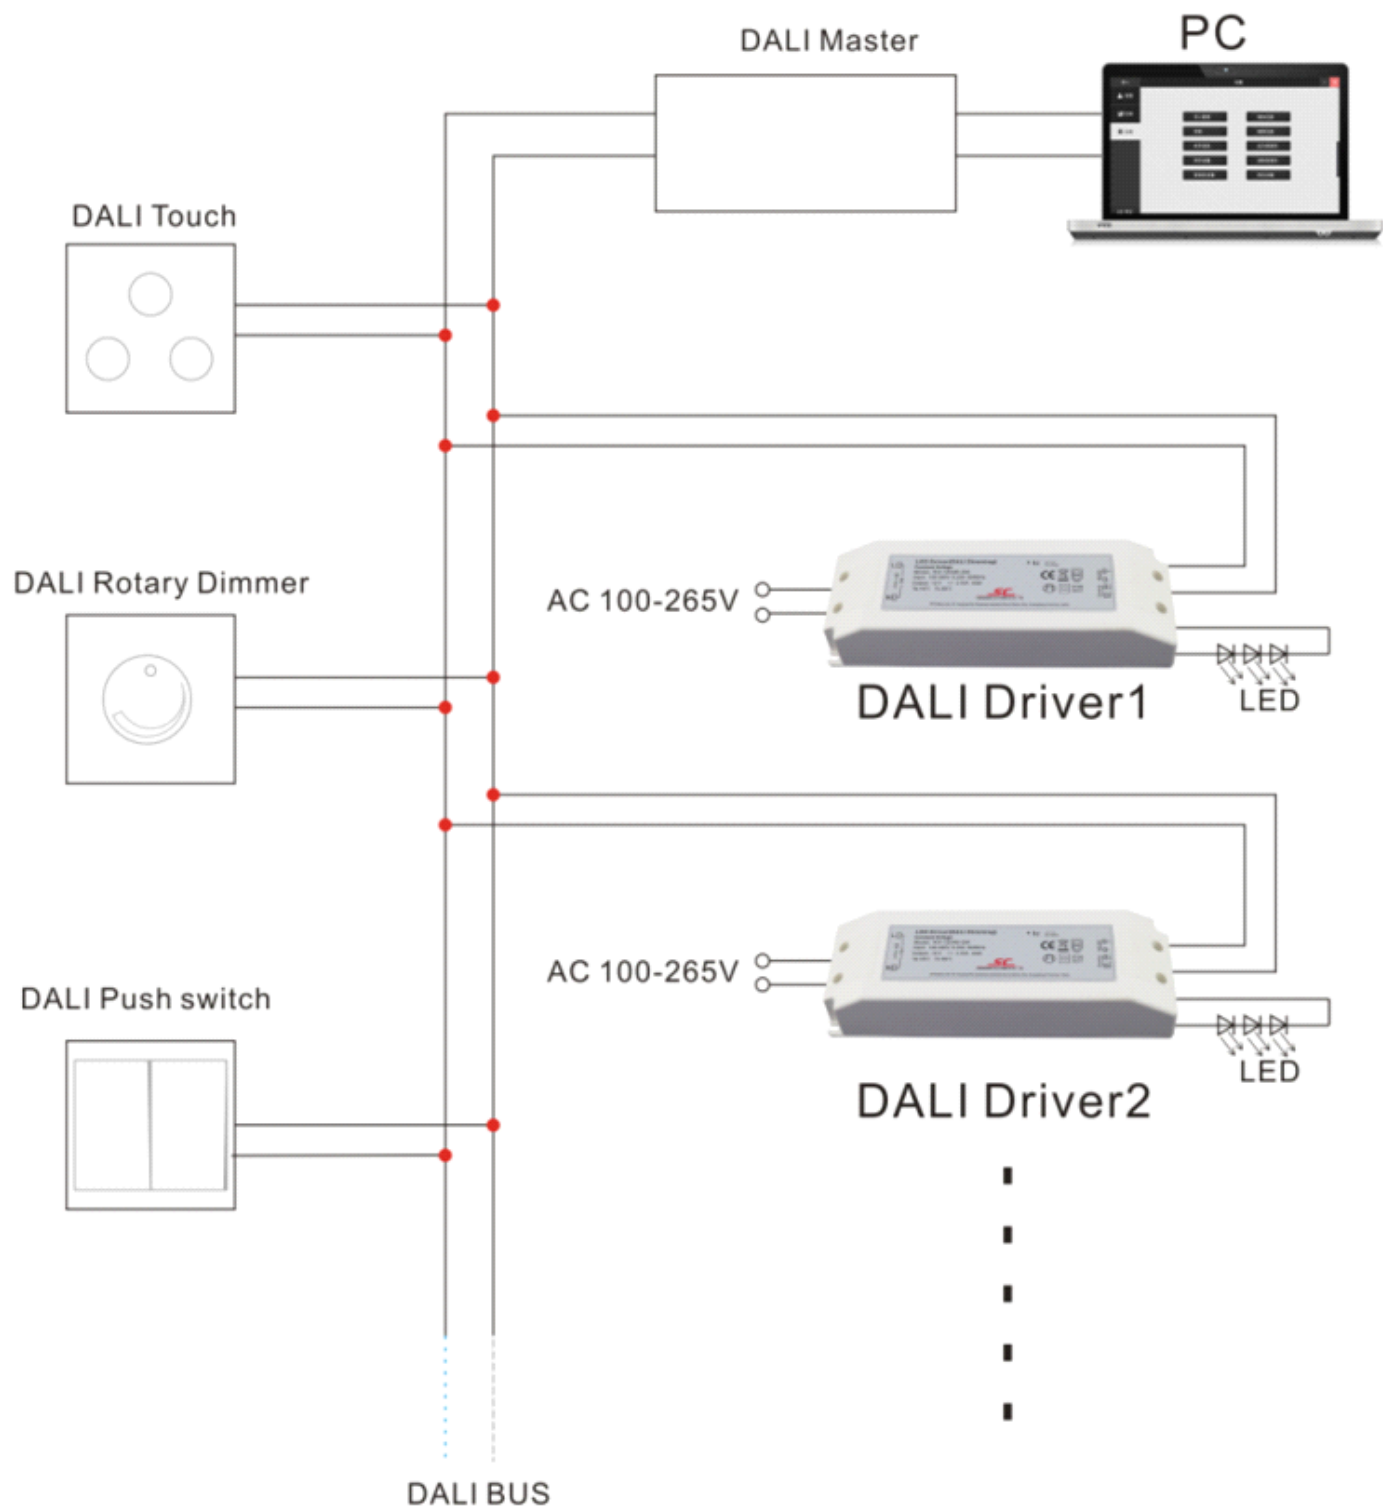

Please refer to Diagram 1

※Notice:In the market, some DALI controllers has bus-powered functions .If not,please add an extra power supply.(DALI Power).

※Any incorrect connecting of signal line and output line would damage the master.
