

DATA SHEET

Touch Sensitive Switch(built-in)

Product characteristic

The touch sensor is designed to be used in linear light fixtures. It's dedicated for switching LED lights "on" "off" and dimming. There is blue indicator light in the PCB to tell you the LED light power on. We control the light through the PC cover to avoid contact with power. Keep your finger in the inducing field to be it brighter or brightness. Switching function will respond within 1 second.

The bottom of the touch switch is equipped with tape that allows secure mounting of the switch and additionally cools down the switch when mounted into an extrusion.

Caution

Do not fix near the fire, inside the refrigerator

Hand with water or glove sometimes will not work that you touch the switch.

Technical Specification

Function	switch on/off dimming
Voltage	DC12-24V
Maximum Power	36W
Dimensions	W*L*H)=12mm x 45mm x 12mm
Thickness of PC cover	3mm
Input socket	DC3.5
Ready to work	5 seconds after power on
